

Barrel Cover - Data Sheet

Load Securing Products

Simple and safe solution to fix barrels on a pallet. These specially developed Barrel Covers are the solution for all companies spending additional cost and valuable time on protection of barrels on pellets or trucks before transportation. We have designed the barrel covers to substitute expensive wooden crates and wooden plates. Protecting and securing with stretch film or shrink foil hood is not necessary anymore.

- The alternative to stretch or shrink foil
- Ready-made belt system = time/cost reduction
- The fast and inexpensive solution for barrel securing on pallets
- Reusable system.
- No waste & material
- Available with ratchet tension system
