Dunnage Air Bags

Standard Valve

The purpose of dunnage air bags is to secure the cargo and create a bulk head during transit. That can be a sea container, a rail car, a truck, a vessel or inter modal. The dunnage air bags are placed into the gaps or void between the cargo and then carefully filled with air. The air bag will safely secure your cargo during transit, by preventing movement and absorbing impacts. Dunnage bags are the most effective and economic solution to secure the goods in a container, rail car or truck.

Features:

- 1 ISO 9001:2008 certified
- 2 SGS and ROHS test report
- 3 100% recyclable
- 4 Various sizes available
- 5 Logo printing possible
- 6 For all climate conditions
- 7 User friendly
